Reading Conservation Commission
16 Lowell Street
Reading, MA 01867

To Whom It May Concern,

This letter is in regards to a planned new construction home at 41 Winter Street in Reading. The Reading Conservation Department approved plans for the property at 41 Winter Street, however I have been asked to revise the plans for the following reasons. The Reading DPW would like me to change the location of the driveway and garage to accommodate snow removal in the area, as the corner of Winter Street and Orange Street is an ideal location to plow snow. The Reading Tree Warden also had concerns about a town tree and whether the location of the approved driveway would damage the tree. In response to these concerns and to accommodate the DPW and Tree Warden's requests, I have revised construction plans to move the driveway and garage from the left side of the house to the right side. I am seeking approval of the new plans that are being submitted to you along with this letter.

Sincerely,
John T. Burns
