- ➡ 2023 Yearly Operational Plan
- ➡ "YOUR MUNICIPALITY"
- ➡ Right-of-Way Maps

The Integrated Vegetation Management activities proposed in the 2023 YOP for the Commuter Rail includes both mechanical and chemical controls. The mechanical controls (brush and tree clearing, trimming, removal), stump and basal treatments, vegetation clearing from Right-of-Way (ROW) track drainage ditches, and touch up of herbicide is scheduled throughout the year. The chemical application for the roadbed is scheduled, weather depending, from May 1 through June 30, 2023. The chemical application for areas adjacent to the roadbed is scheduled, weather depending, from August 1 through October 31, 2023.

The ROW Maps for each city/town reflect the herbicide application zones approved through the five-year Vegetation Management Plan permit issued for 2021-2025. The identification on the maps of private drinking water supply wells remains an ongoing process. **Please notify Fair Dermody Consulting Engineers, Keolis, and the Department of Agricultural Resources of any omissions and or new private drinking water supply wells.**

Please review your mailing address and the ten-digit police department emergency telephone number listed in the Plan and notify us of any revisions. Hard copies of all documents are available upon request, please email Matt@FDCEngineers.com.
